# DAIKIN VRV AHU SYSTEM

Standard Series AHURS-DBV  
Outdoor Air Series AHURS-DBL

Improve Indoor  
Air Quality

Easy Installation

Wide Range of  
Add-on Options

DSP-VRVAHU-18001

# BENEFITS OF USING DAIKIN EC SOLUTION

## TECHNOLOGY FEATURES

- Unrivalled Compactness
- High Efficiency
- Robust Design
- Economical Operation
- Low Noise Emissions
- Low Vibration Level
- Long Service Life
- Reliable Operation

## SAVINGS

- Save on Space – Smaller AHU Size
- Save on Components - Inverter, Sine Filter, Premium Motor, Shielded Cable, Motor Protection
- Save on Cost - Installation & Maintenance Cost

## Fan Array Air Flow Range

NO. OF FAN	AIR FLOW RANGE (m³/s)
1-FAN	0.67-4.1
2-FAN ARRAY	1.34 -8.2
4-FAN ARRAY	2.68 - 16.4
6-FAN ARRAY	4.02 - 24.6
8-FAN ARRAY	5.36 - 32.8

\* RATED AT TOTAL PRESSURE 800Pa

# VRV AHU Applications

# VRV AHU

## Features of VRV AHU

- Harnessing VRV VRT technology
- Inverter controlled system
- Can be easily controlled via standard wired remote control (BRC1E62) (only for standard model)
- Comes in double skin panel model (Single skin option available)
- Easily managed using intelligent Touch Manager central control system
  - Communication protocol using DIII-Net to communicate with all existing Daikin communication devices. (option to connect directly to BACnet® BMS)
- Can be placed indoor or outdoor\*

## 6 Benefits of using VRV AHU

- Quality and warranty assured
  - VRV AHU are manufactured by Daikin factory.
- Ease of installation
  - No additional system such as cooling tower, chiller, and long water piping system are required. This also reduces the total system maintenance costs.
  - Flexible design of the ducting system.
- Cover large area with different ducting configuration.
- VRV AHU can provide ESP up to 500Pa\*<sup>2</sup> (Standard Model)
- Total solution concept
  - Integrating an AHU into the total building climate system enables both design and installation procedures to be based on a single common technology. This simplifies project follow-up, installation, commissioning and maintenance since only one party is involved.
- VRV AHU system can be combined with other types of indoor units to operate concurrently.

## Options

Wide range of options to meet design requirements. Please contact Daikin's Sales Office on options below:

- Fan Type
  - Backward Curve Aerofoil
  - Plug Fan
  - Electronically Commutated Fan (EC Fan)
- Fan Motor control
  - VSD
  - Fixed Speed
- AHU Coil Material Type
  - Copper Fin
  - Blue Fin
  - Epoxy Coated Fin and Coil
- AHU Drain Pan Type
  - Acrylic Enamel with Steel Coating
  - Galvanized Steel
- AHU Air Filter Type
  - Medium Filter
  - Extra Filter
  - Synthetic
  - Bag
  - HEPA
  - Aluminum
  - Cartridge
  - ULPA
- Special Option
  - Electric Heater
  - Mixing Box
  - Outdoor Roof
  - Heat Pipes
  - Motor Starter Box
- Customisation
  - Airflow
  - Capacity
  - ESP
  - Discharge Direction
  - Heat Recovery Wheel
  - Piping Outlet
- Controller for Outdoor Air Series
  - MicroTech III\*<sup>3</sup>(DDC)

Notes:

\*1 Optional items required

\*2 For ESP more than 500Pz, please contact Daikin's Sales Office

\*3 BACnet interface

## VRV AHU Introduction

Daikin released 2 series of VRV AHU, standard series model AHURS-DBV and outdoor air series model AHURS-DBL. It is a DX AHU that is specially designed to operate with VRV outdoor unit. This enabled the users to reduce maintenance costs and enjoy more space savings.

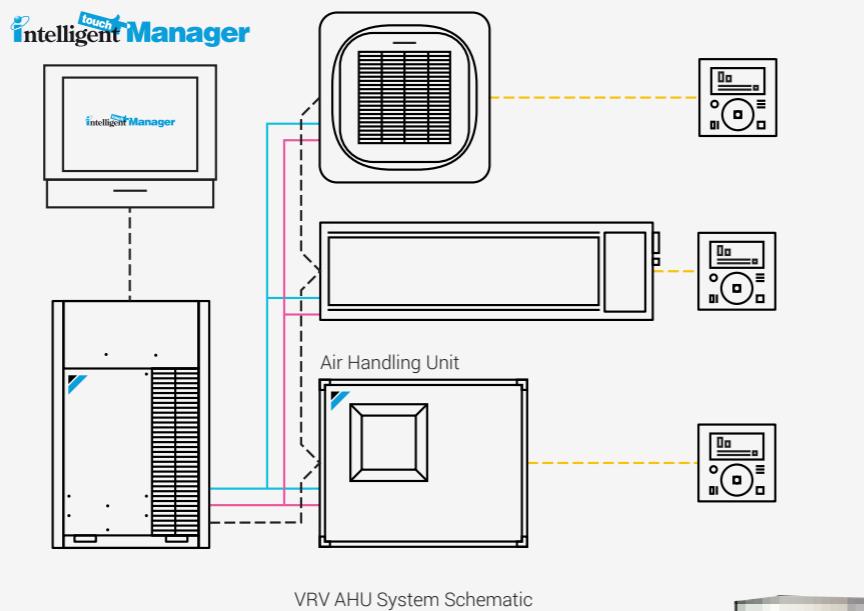

Daikin VRV AHU improves the indoor air quality caused by haze, pollutants, etc with options of pre-filters and primary filters. This is the only total AHU solutions provided and manufactured completely by Daikin.

## Total Daikin Solutions

(All products manufactured by Daikin Factory)

--- Control Wiring  
— Remote Control Wiring (P<sub>1</sub>P<sub>2</sub>)  
— Liquid  
— Gas

## VRV AHU Application

From small to large commercial spaces, Daikin offers a wide range of R-410A inverter condensing units for use in conjunction with Air Handling Units (AHU) from 6 HP to 120 HP.

AHU provides large air volumes and high ESP (External Static Pressure) enabling the use of extensive ductworks. The refrigerant flows through the copper pipes using R-410A and operates like a large VRV fan coil unit.

Daikin AHU represents the ideal solution for large storage places, atrium, lobby, banquet halls, showrooms, exhibition halls, shopping malls, etc.

It also has the options to customize the specifications such as the filtration type, direction of air in-take and discharge, service access door and blower type (backward or forward curves and plug fan).

### What is VRV?

Daikin VRV system is a multi-split type air conditioner for commercial buildings that uses variable refrigerant flow control invented by Daikin.

It enables long piping length up to 165m and maximum level difference (between outdoor and indoor units) of 90m to provide more design flexibility which can match even large-sized buildings.

It allows one touch selection control using intelligent Touch Manager and includes options to link with BACnet® to enhance the Building Management System (BMS).

## Nomenclature

### AHURS 06 DB V

AHURS	DX Air Handling Unit Horizontal Mount
06	Cooling Capacity: 06 = 6HP
DB	Double skin 50mm thickness
V	V: Standard   L: Outdoor Air

## Comparison Table and Diagram for Conventional AHU System and VRV AHU System

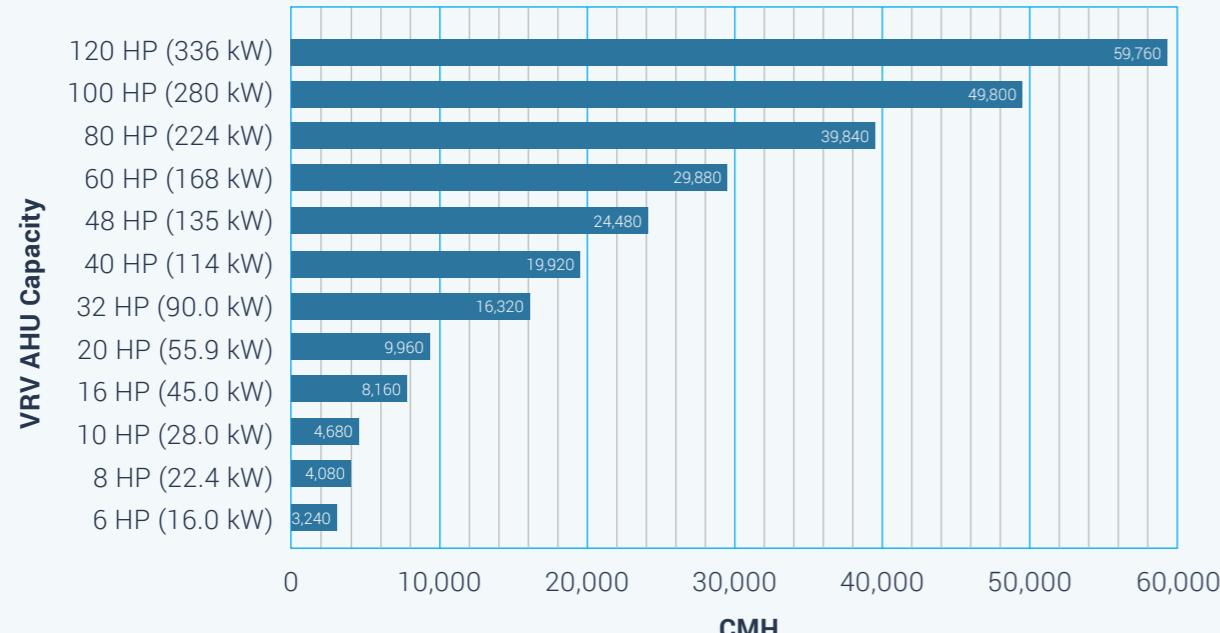

Conventional AHU System	VRV AHU System
Require Frequent Maintenance (Cooling Tower + Chiller)	Easy Maintenance (same as common A/C System)
Higher Cost Due to Frequent Maintenance	No Additional Maintenance Cost
Require Larger Installation Space (AHU, Chiller, Coolong Tower)	Require Small Installation Space (AHU, VRV)
Complex System (HVAC Ducting, Chiller and Water Piping)	Simple System (HVAC Ducting)
Complex Control (Variable Frequency Device, Variable Air Volume Control)	Simple Control (Remote Control / Intelligent Touch Manager / MicroTech III Controller)
Conventional AHU System	VRV AHU System

# Standard Series AHURS-DBV

AHURS-DBV (Standard Series)

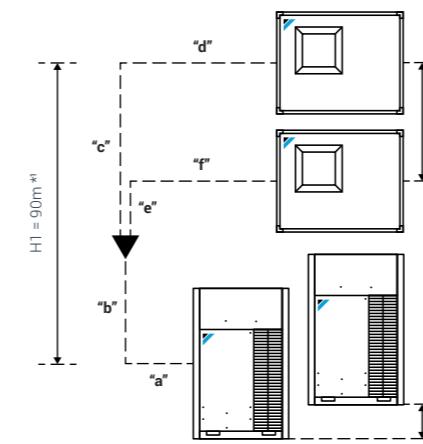

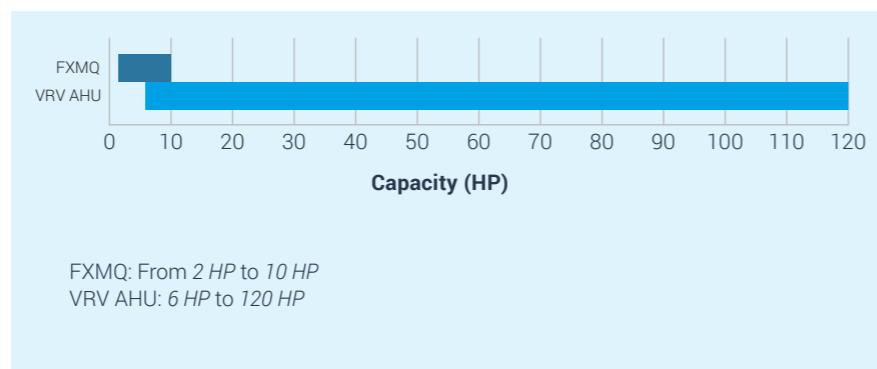

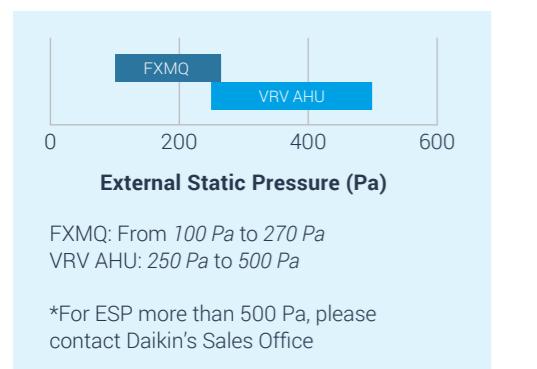

## VRV AHU Introduction Standard Series

The VRV AHU standard series are available from the capacity range of 6 HP to 120 HP, also with airflow ranging from 3,240 CMH - 59,760 CMH.

## Expanded Line Up for Daikin VRV Indoor Series

Comparison for External Static Pressure and Capacity between VRV AHU and Duct Typed Unit  
VRV AHU offers higher ESP and Capacity as compared to duct type fan coil unit.

## VRV AHU System Structure (Maximum Allowable Piping Length and Height)

### AHURS-DBV (Standard Series)

1. Longest Pipe Length =  $a + b + c + d = 165\text{m}$
2. Longest Pipe Length after First Refnet =  $c + d = 40\text{m}$
3. Total Pipe Length =  $a + b + c + d + e + f = 1,000\text{m}$

\* 1 When level differences are 50m or more, the diameter of the main liquid piping size must be increased.  
If the outdoor unit is above the indoor unit, a dedicated setting on the outdoor unit is required. Please contact Daikin's Sale Office for more information.

## VRV AHU Standard Series Evaporator

AHURS-DBV standard series model use DX coil. Each DX coil will be connected to an expansion valve and controlled by one standard series PCB.

VRV AHU Standard Series Evaporator Coils

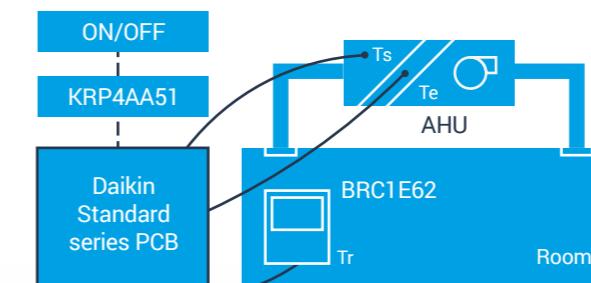

- 5 capacities of Evaporator Coils

- 6HP used on 6HP AHU unit
- 8HP used on 8HP AHU unit
- 10HP used on 10HP AHU unit
- 16HP used on 16HP, 32HP, 48HP AHU unit
- 20HP used on 20HP, 40HP, 60HP, 80HP, 100HP, 120HP AHU unit

### Possibility Z (Ts/Tr control):

Using Daikin wired remote controller (BRC1E62 - optional) Set point can be fixed via standard Daikin wired remote controller. Remote ON/OFF can be achieved by an optional adapter KRP4AA51.

No additional external controller is required. The cooling load is determined from the air suction temperature and set point on the Daikin remote controller.

Ts = Air suction temperature   Te = Evaporating Temperature  
Tr = Room temperature   AHU = Air Handling Unit

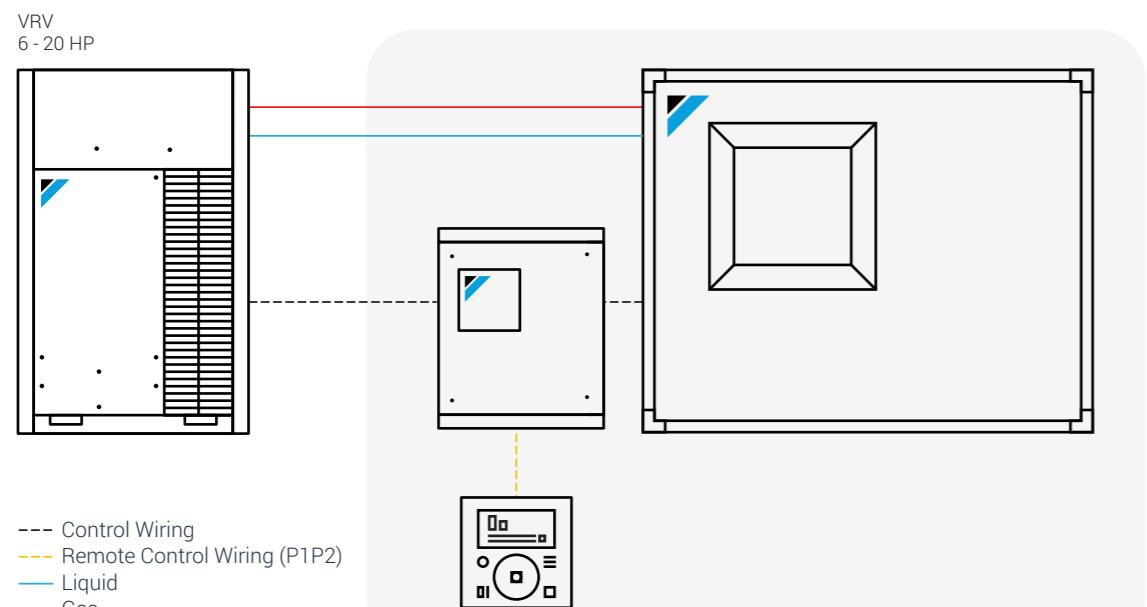

## VRV AHU Operation Range

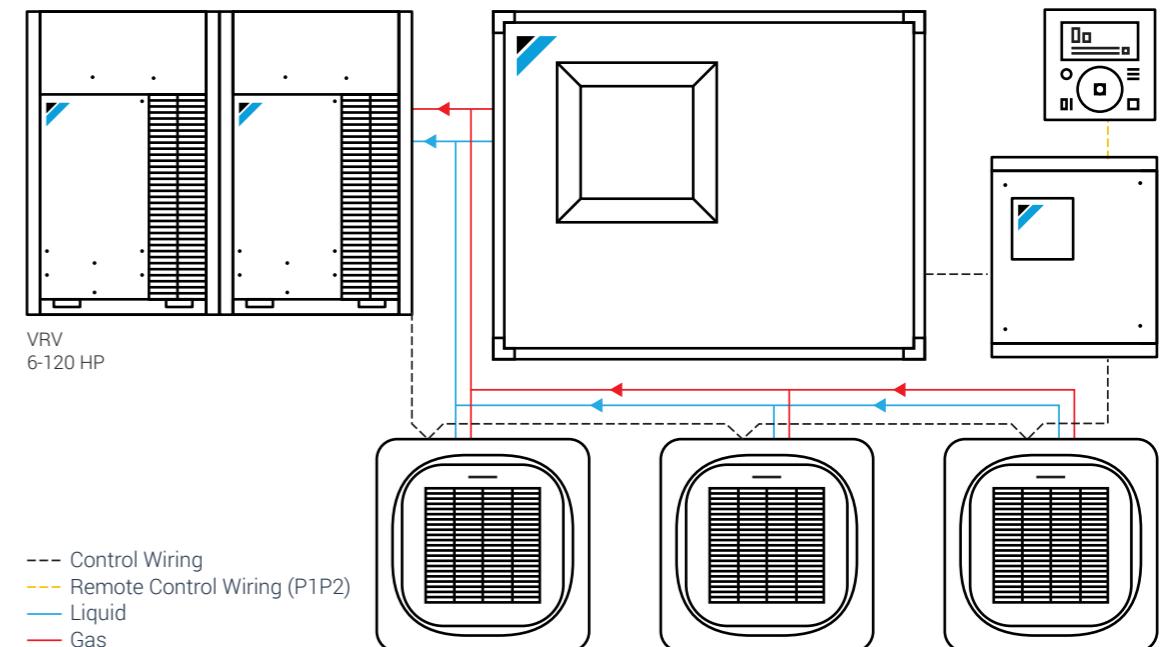

VRV AHU AHURS-DBV operation is similar as other VRV indoor unit. Following table is the list of operation range for AHU.

		Temperature Range	
		Cooling	
Entering Air Temperature to VRV AHU		Minimum	
		14°C WB	
		35°C DB / 25°C WB	
Outdoor Unit	VRV IV	Maximum	
		-5°C DB	
Expansion Valve		Minimum	
		49°C DB	
Standard series PCB		Minimum	
		-10°C DB	
		40°C DB	

## VRV Connection to AHU Configuration

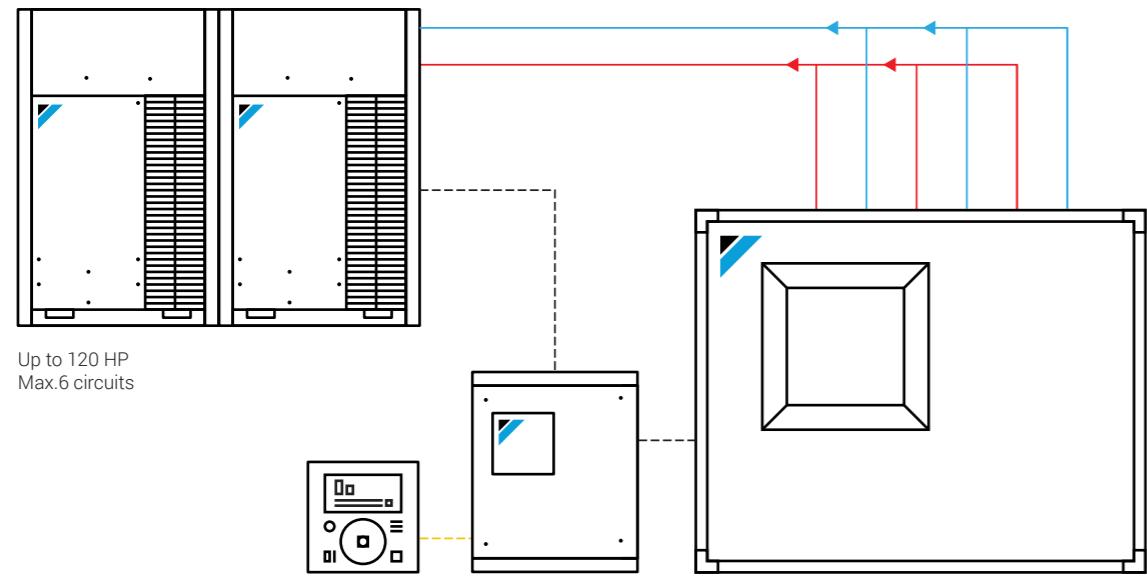

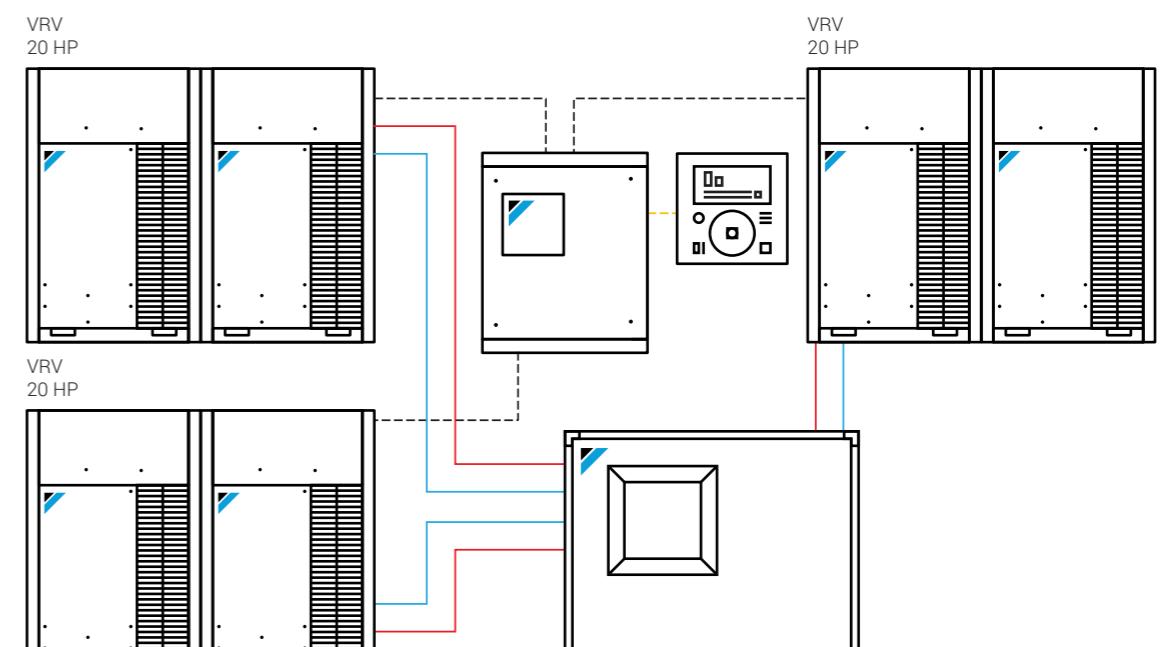

Single VRV System Configuration

Multiple Indoor Units with AHU Configuration

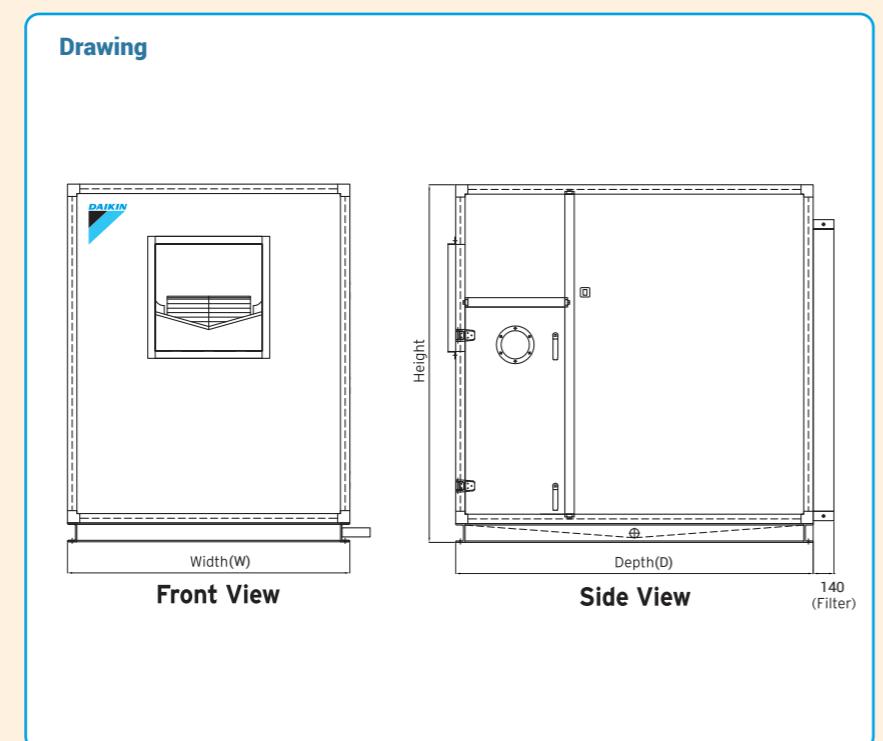

\*In case of more than 60 HP system, connection is Multiple VRV system

Each coil up to 20 HP  
(Max combination of 6) = 120 HP

Multiple VRV System Configuration

AHU Specification AHURS-DBV		
1	CASING / INSULATION (DB SERIES)	50mm Thickness Double Skinned Polyurethane Insulated Sandwich Panel 0.5mm thick Pre-Painted (white) Galvanised Steel Thermal Break System, Ozone friendly Polyurethane Foam 45±2kg/m³

# Outdoor Air Series AHURS-DBL

Outdoor Air Series AHURS-DBL

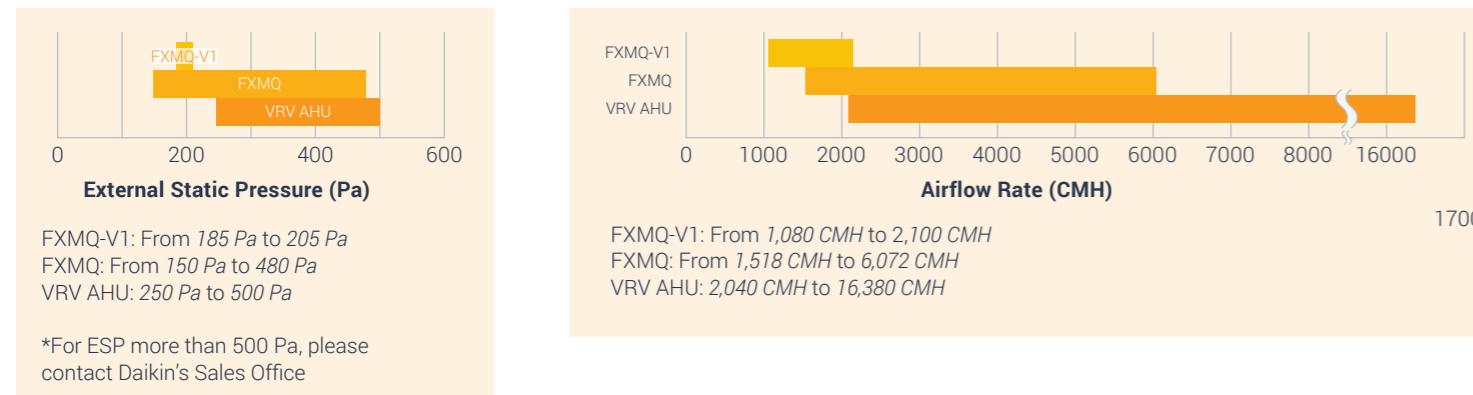

## VRV AHU Outdoor Air Series

The VRV AHU Outdoor air series are available from the capacity range of 8 HP to 60 HP also with airflow ranging from 2,040 CMH - 16,380 CMH.

## Comparison for ESP and Capacity between VRV AHU, Ceiling Mounted Duct Type and Floor Standing Duct Type.

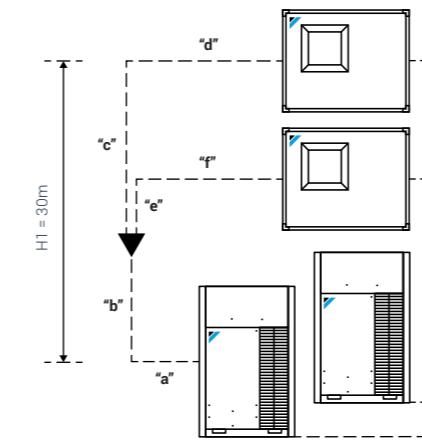

VRV AHU offers higher ESP and airflow rate as compared to duct type units.

## VRV AHU Operation Range

VRV AHU AHURS-DBL operation is similar as other VRV indoor unit. Following table is the list of operation range for AHU.

		Temperature Range
		Cooling
Entering Air Temperature to VRV AHU	Minimum	14°C WB
	Maximum	35°C DB
Outdoor Unit VRV IV	Minimum	-5°C DB
	Maximum	49°C DB
Expansion Valve		Minimum: -5°C DB Maximum: 46°C DB
Outdoor air series PCB		Minimum: -10°C DB Maximum: 40°C DB

## VRV AHU System Structure (Maximum Allowable Piping Length and Height)

### AHURS-DBL (Outdoor Air Series)

1. Longest Pipe Length =  $a + b + c + d = 165\text{m}$

2. Longest Pipe Length after First Refnet =  $c + d = 40\text{m}$

\* 1 When level differences are 50m or more, the diameter of the main liquid piping size must be increased.  
If the outdoor unit is above the indoor unit, a dedicated setting on the outdoor unit is required. Please contact Daikin's Sale Office for more information.

## VRV AHU Outdoor Air Series Evaporator Coil, Expansion Valve and Outdoor Air Series PCB

AHURS-DBL Outdoor air series use DX coil. Each DX coil will be connected to expansion valve and controlled by one Outdoor air series PCB. VRV AHU Outdoor air Series Evaporator Coils

- 4 capacities of Evaporator Coils
  - 8HP **used on 8HP AHU unit**
  - 10HP **used on 10HP AHU unit**
  - 16HP **used on 16HP, 32HP, 48HP AHU unit**
  - 20HP **used on 20HP, 40HP, 60HP AHU unit**

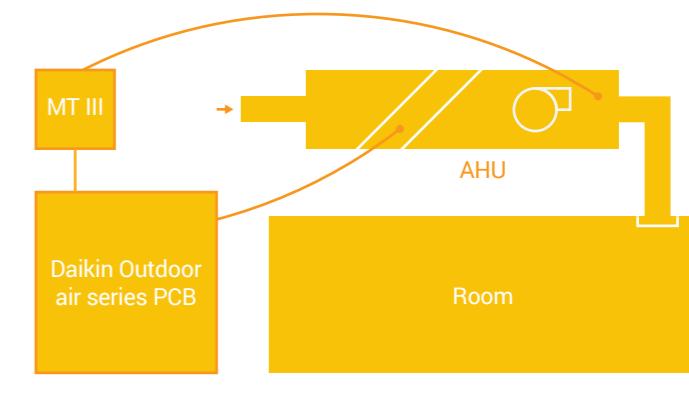

### Possibility X (Td/Tr control):

Precise air temperature control via MicroTech III (MT III) controller (option)

Room temperature is controlled as a function of the air handling unit suction or discharge air (customer selection). The MT III controller translates the temperature difference between set point and air suction temperature (or air discharge temperature or room temperature) into a reference voltage (0-10V) which is transferred to the Daikin Outdoor air series PCB.

This Reference voltage will be used as the main input value for the compressor frequency control.

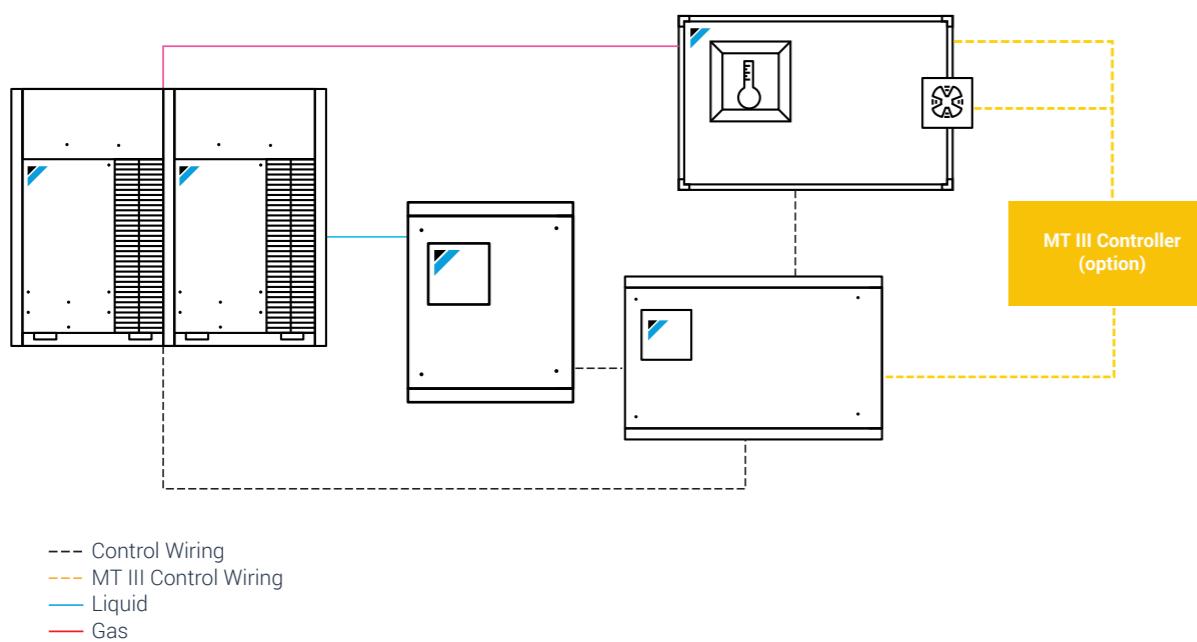

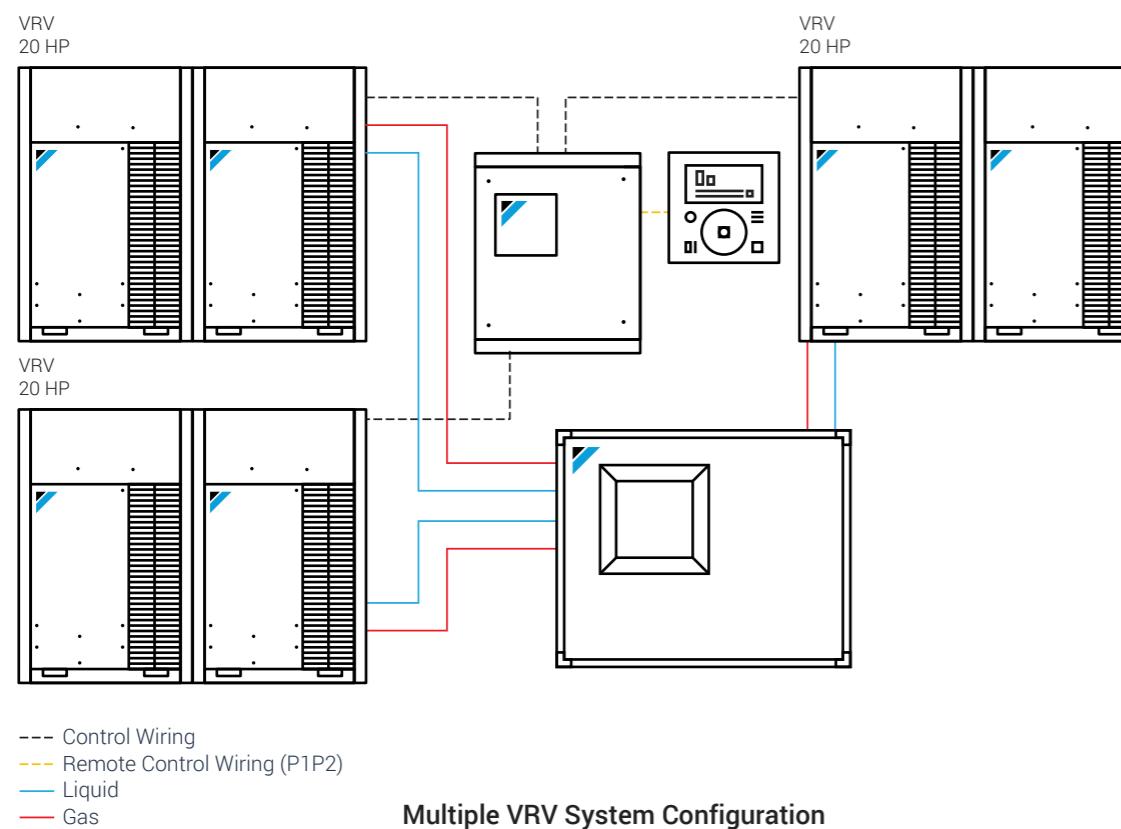

Td = Air discharge temperature  
Temperature (13°C ~ 28°C)

Te = Evaporating  
AHU = Air Handling Unit

## MicroTech III controller (option)

MT III controller is recommended for Outdoor air series AHU controlling, switching and monitoring functions. This controller is programmed to optimize the performance and efficiency of VRV AHU automatically. It can also communicate with Daikin's intelligent Touch Manager via BACnet protocol easily.
